BUTTERFLIES, DRAGONFLIES and DAMSELFLIES OF THE CEDARBURG BOG

The Cedarburg Bog system is made up of about 2200 acres that include a variety of plant communities including conifer and hardwood swamps, sedge meadow, marsh, several lakes, fen, and upland forests. There is public access at the north end of the Bog (Hwy 33) and south end (Cedar Sauk Rd). The UWM Field Station trails are only open to the public for group use arranged in advance or at public events.

Please do not harass, harm or collect the butterflies and dragonflies you see here.

Like all species lists, these lists are works-in-progress. If you see a butterfly or dragonfly that is not on the list, please report it to Friends of the Cedarburg Bog, c/o UWM Field Station, 3095 Blue Goose Rd, Saukville, WI 53080. Or use the Friends of the Cedarburg Bog website at <http://bogfriends.org/contact-us>.
