* = species is represented in Field Station herbarium

Nomenclature follows Wisflora: Wisconsin Vascular Plant Species
(Wisconsin State Herbarium, Univ. of Wisconsin-Madison) <http://www.botany.wisc.edu/wisflora/>

1: * = species is represented in Field Station herbarium

Wisconsin status: C = special concern, T = threatened, E = Endangered

2-Habitat codes

CS = Conifer Swamp

D = Disturbed

SH = Swamp hardwoods

SC = Shrub Carr

FD = Old Field

M = Marsh

OB = Open Bog

UW = Upland Woods

A = Aquatic

FW = Wet Field

V = Various (occurring in >3 habitats)

P = Planted at the Field Station;

probably not occurring naturally

3 - Wetland Indicator Status

WisFlora, <http://www.botany.wisc.edu/herb/wetind.asp>

OBL = Obligate wetland

FACW = Facultative wetland

FAC = Facultative

FACU = Facultative upland

UPL = Obligate upland

NI = No Indicator

4 - Coefficient of Conservatism (WisFlora, <http://www.botany.wisc.edu/WFQA.asp>)

Native species are assigned a code from 0-10 representing the likelihood that they are found in a landscape relatively unaltered from what is believed to be a pre-settlement condition.

0 is assigned to plants that may be found almost anywhere.

10 is assigned to plants that are almost always restricted to undegraded natural communities.

E = exotic (no C value).

PI = potentially invasive, I = invasive
